

Experienced Back-end Software Engineer

Description

As a software operations engineer you'll mostly be involved in making sure our Enterprise SAAS solution runs smoothly: infrastructure architecture (e.g. high availability), automated deployment, monitoring & logging, performance, ...

You'll be supported by a small & agile development team (7 devs) to achieve this.

There are no levels of hierarchy within Skedify development team and we go to great lengths to make team collaboration as pleasant and effective as possible.

You like to optimize the automated Application Lifecycle Management processes (build, test, deploy, monitor) for our web solution which has the following tech stack: PHP (Laravel), React/Preact, MySQL, Elasticsearch and Node.js. Knowledge of any of these technologies is a big plus, as is experience with deploying them.

You will also help to keep data safe and secure, follow up on and implement the latest security standards and improve security awareness within the company.

Your skills

Technical skills

Demonstrable experience

- Configuration management and automation tools
- With most of the following technologies: Ansible, Python, Azure, Linux
- Infrastructure performance (e.g. New Relic)
- Logging solutions (e.g. ELK), ...
- Not afraid to use command line tools
- Good insights into software architecture

Skills to delight us with:

- Experience with Continuous Integration (e.g. Jenkins, Travis, Teamcity, GitLab, ...) and provisioning tools
- Software engineering background or relevant experience
- Knowledge of managing a relational database
- You're familiar with Git

Personal skills

- You're driven by your passion for tech and innovations in DevOps
- You can spot links and associations when searching for problems
- You have the ambition to become an expert in what you do, you are willing to invest in yourself and you have a strong focus on the client
- You're looking to have an impact on Skedify
- Growing your own and the team's expertise and skill set is constantly on your mind
- You're confident, but also modest
- You're analytic, but also pragmatic
- If you could, you'd automate everything into a single click

What we offer you?

- A recent technology stack running with a major cloud provider
- A company transitioning from start-up to scale-up, but never corporate
- A position in a dynamic team
- An informal atmosphere, with open communication and a no bullshit attitude
- Working at an awesome location - Blaarmeersen / Watersportbaan - with easy access, parking and surrounded by nature
- Fun activities: ping-pong at the office, bowling, paintball, lunch-picnicking and kubb in the summer, beer o'clock, etc...
- Yummy coffee and fresh fruit baskets
- And of course, a competitive salary with many extra benefits such as meal vouchers, hospitalization insurance and others
